

Pentrehafod Comprehensive School

A redevelopment and refurbishment of Pentrehafod School to supply and fit classrooms, science rooms and social breakout areas with new furniture. Classroom chairs, stools and agile benching all incorporated the school logo colours adding a splash of life to each area. Soft seating and coffee tables were provided for reception and break out areas and classrooms contained white board teaching walls.

Ministry of Furniture worked with Pentrehafod School to redevelopment and refurbish certain areas within the school including classrooms and social breakout areas, this project was an on-going development over a 2 year period. We supplied the school with new classroom tables segment tables, project tables, EN Series chairs and high chairs. For social breakout areas and agile working spaces we provided a range of soft furnishings complemented with coffee tables and the contemporary Agilis bench tables and bench seating.

Our team of interior designers worked with the school to ensure all areas were multi-functional and met the requirements of the brief. The social areas with the Agilis benching furniture allowed us to bring colour into the room using the school's orange and blue theme.

“First class service! All requirements of the brief we set were met. Onsite work and all furniture installation was completed in a professional and efficient manner, with all jobs completed on time by the Ministry team. We are very pleased with the newly furnished areas provided by Ministry of Furniture.”
