

Gorseinon Primary School

This £6.9m project was a complete new school build, a state of the art development replacing the old Victorian school buildings. Working with Andrew Scott Construction and Swansea Council the Ministry of Furniture team were very excited to work on this project.

We furnished all classrooms and the schools main street area with bright coloured seating, tables of various heights and a variety of storage units for toys, books and teaching tools.

The main street area is decorated in bright bold colours with colourful soft seating furniture and storage units to compliment this, it provides a great social area for children to interact away from the classroom.

“Ministry of Furniture completed the supply and install of the furniture in Gorseinon Primary School with minimum fuss. All works were completed within programme and the team cleaned up as they progressed through the school whilst working in a safe manor.”
